

3-Pointers Dominate Recent NBA Gameplay

Over the past 16 seasons, teams have significantly increased their reliance on three-point shooting, with total three-pointers made rising from 193.2 in 2010 to 403.8 in 2025. The percentage of total points from three-pointers has also climbed from 19.2% to 35.6%, highlighting a shift toward perimeter scoring. This trend reflects a strategic evolution in the game, with teams prioritizing efficiency and spacing through increased three-point attempts.
